Detail Information

Place Of Origin:	
China	
Certification:	
CE / ISO Certification	
Sysyem:	
Hydraulic	
Bucket Form:	
Backhoe	
Powerful Engine:	
Robust Engine	
Basket:	
Backhoe	
Product Model:	
Caterpillar Excavator	
Oils:	
Diesel Oil	
Warranty:	
One Year	
Power:	
41.5kw	
Supply Ability:	

5 - 10 Units Per Month
Highlight:
Cat307 Hydraulic Used Mini Excavator, Used 41.5kw Robust Crawler Excavater

| Product Description

Used CAT Crawler Excavator Digger: Premium Specifications

The Used CAT Crawler Excavator Digger is a top - quality construction equipment option. With an operating weight of 7 TON and a machine weight of 6900 KG, it strikes a perfect balance between stability and maneuverability. Its 0.33 M³ bucket capacity, powered by a 41.5KW Cat C2.6 DI Turbo engine, offers reliable performance for various tasks. It boasts core components like pressure vessel, motor, and PLC, all in excellent condition. With only 500 - 700 working hours, and accompanied by a machinery test report and video outgoing - inspection, this excavator guarantees transparency and quality.

Project	Cat 307
Working weight	6900kg
Power	41.5kw
Bucket capacity	0.33m³
Maximum walking speed	High: 5.1 / Low: 3.2km/h
Overall length	6070mm
Overall width	2300mm
Maximum digging radius	6300mm
Maximum digging depth	4070mm
Maximum digging height	7240mm
Maximum unloading height	5190mm
Maximum excavation radius at ground level	6180mm
Engine Name	Cat C2.6 DI Turbo
Engine displacement	2.6L

Excellent Working Condition for Reliable Operation

These used CAT excavators are in excellent working condition. The engine power is robust, with no repair history, ensuring consistent and reliable performance. The main core components, including the engine, hydraulic pump, distribution valve, and rotating motor, are all undamaged. The seamless mechanical matching and efficient hydraulic system not only enhance its durability but also make it cost - effective and highly flexible during operation, allowing it to adapt to different job site requirements with ease.

Diverse Applications in Construction and Beyond

In construction engineering, it serves as a reliable assistant for housing and road construction projects. It efficiently handles earth excavation and pipeline laying, contributing to the development of urban and rural infrastructure. For mining operations, its powerful driving force and wear - resistant features enable it to handle rock excavation and ore loading effortlessly, boosting mining efficiency. In farmland and water conservancy, it is used for river dredging and farmland reclamation, improving irrigation conditions and promoting agricultural production. In landscaping, it precisely digs tree pits and shapes terrain, while during demolition and clearance, its strong crushing ability quickly clears the way for new construction. In industrial

construction, it undertakes earthwork in factory expansions, adapting well to complex environments.

Support and Services

- **Troubleshooting and diagnosis:** Handle any technical issues with professional diagnosis and solutions.
- **Repair and maintenance:** Provide regular and on - demand services to ensure your excavator runs smoothly.
- **Parts and component replacement** Replace damaged or worn - out parts promptly with high - quality components.
- **Equipment inspections and evaluations:** Conduct thorough inspections to accurately assess the condition of your excavator.

FAQ

Q1: Is your company a factory or a trading company?

A: We own our factory, overseeing everything from production to quality inspection to ensure reliable product quality.

Q2: How do you guarantee product quality?

A: We've established a full - process quality inspection system. Every step, from raw material procurement to the production process, is rigorously verified to eliminate potential quality issues.

Q3: How do you transport the equipment?

A: We support bulk or container shipping. With our long - term partnerships with shipping companies, we offer cost - effective logistics solutions.
